PROJECTS

1.EduStack (In Development) — GitHub

A student resource hub website with hero section, dark mode, AOS animations, and search functionality.

Developed using Next.js, Tailwind CSS, and Framer Motion.

Features a consistent navigation bar design and responsive layout for seamless cross-device experience.

2.Advanced Todo List App — GitHub

A feature-rich task management app with theme toggle, search, filter, edit, and persistent storage using localStorage.

Developed in React with modular components and responsive UI.
